Summary

I am a researcher at PROFACTOR / JKU working at the intersection of computer vision and robotics. My research interests include the fusion of deterministic machine learning with probabilistic models through stochastic computational graphs and graph neural networks. Recently, I created a widely used real-time 3D reconstruction software called ReconstructMe¹ and initiated several popular open source projects². These projects are now used by a variety of research groups worldwide, including Facebook, Google, and Microsoft.

Interests. Machine Learning, Computer Vision, and Robotics.

Education

2017–now **Doctoral Candidate**, *Johannes Kepler University, Linz*, Computational Perception.
Visual Perception and Interaction Using Synthetic Data in Manufacturing

2000–2004 **DI(FH)**, *FH Upper Austria, Hagenberg*, Software Engineering.
Pairwise Registration of 3-D Range Data: Analysis and Evaluation of Modern Algorithms

Experience

My professional work experience as a full-time researcher.

2016–now **Researcher**, *PROFACTOR GmbH, Steyr*.
Machine Learning for Visual Computing

2008–2016 **Senior Research Engineer**, *PROFACTOR GmbH, Steyr*.
Robotics and Adaptive Systems

2004–2008 **Research Engineer**, *PROFACTOR GmbH, Steyr*.
3D Computer Vision

Research Projects

A selection of research projects that I have worked on in the past and for which I partly helped to secure funding.

2019–2022 **Medusa**, *Innovatives OÖ 2020*, 2.000.000€.
Leitprojekt Medizintechnik: Creation of an innovative training and planning platform for neurosurgeons with vision-based behavior documentation.

2017–2021 **Lern4MRK**, *BMVIT*, 2.000.000€.
Learn to map human demonstrations onto collaborative robots.

2015–2018 **Autoscan**, *FFG*, 1.300.000€.
An autonomous sensor system utilizes human activity forecasting for active thermography planning.

¹<https://www.reconstructme.net/>

²<https://github.com/cheind>

- 2015–2017 **SIAM**, *FFG*, 730.000€.
Seamless interoperability of assistive modules in the digital factory for automated 3D documentation.
- 2013–2017 **NextFactory**, *ICT*, 4.760.000€.
All-in-one manufacturing platform for system in package and micromechatronic systems.
- 2012–2014 **ShowMe**, *FFG*, 560.000€.
Assistive system for assembly tasks based spatially correct projections and next step recommendations.
- 2010–2013 **SRS**, *ICT*, 5.000.000€.
Semi-autonomous robotic solutions in domestic environments for elderly people support.
- 2008–2010 **AHUMARI**, *FFG*, 400.000€.
Fusing robot programming by demonstration with visual tracking.

Awards

- 2018 2nd place in the classification of acoustic scenes (DCASE2018)
- 2017 Best oral presentation (ICMV2017)
- 2012 enGenius award for our Binpicking system iRobFeeder (BMW)
- 2007 Hagenberg Software Award
- 2006 State Award for Innovation (Landespreis für Innovation)

Patents

- 2020 Calibration method for a projector - Kalibrierverfahren für einen Projektor (A50411/2019)
- 2017 Apparatus for detecting a three-dimensional model corresponding to the surface of an object - Vorrichtung zum Erfassen einer Oberfläche eines Objektes entsprechenden dreidimensionalen Modells (AT519447B1)
- 2009 Method for continuously determining a gripping position (WO2011003124A1)

Miscellaneous

- 2019 Host of Workshop (OAGM2019)
- 2019 Reviewer (IJCAI2019), Session chair (ETFA2019)
- 2017–2020 Supervised three master students
